

Alberto Carlos Castro Castro

Senior Backend Software Engineer

ingcastro214@gmail.com | +57-312-334-7870 | [linkedin.com/in/cazcode/](https://www.linkedin.com/in/cazcode/) | <https://cazcode.github.io/>

Skills

Languages:	SQL, java 8-21, NoSQL
Frameworks:	Spring Framework, Spring Boot, JUnit, Mockito
Databases:	Oracle, SQL Server
Technologies / Tools:	Maven, Gradle, Docker, AWS, GCP, Jenkins, Azure, Git, GitLab
Practices:	Agile development methodologies, Scrum, SOLID, design patterns, object-oriented programming, Microservices, Event-Driven Architecture, Clean Architecture, Distributed Systems, REST APIs

Experience

Globant

Senior Software Engineer

Oct 2025 – Present

- Designed and developed enterprise backend services supporting large-scale eCommerce operations using Java 21 and Spring Boot.
- Designed event-driven microservices using Apache Kafka, producers and consumers for asynchronous processing.
- Integrated enterprise applications with multiple third-party systems.
- Implemented Redis distributed cache, reducing average API response time by 32% and decreasing database load during peak traffic.
- Developed reusable enterprise components using Scaffolding Architecture.
- Designed RESTful APIs supporting high-volume business operations.
- Automated software delivery using GitLab CI/CD pipelines.
- Designed backend solutions for enterprise integrations following Microservices Architecture.
- Collaborated with DevOps and QA teams following Agile Scrum methodologies.
- Developed scalable backend services using Java 21 and Spring Boot.

Perficient LATAM

Senior Software Engineer

Oct 2023 – Jan 2025

- Developed scalable REST APIs that improved system throughput by 20% using AWS.
- Designed scalable REST APIs and Microservices.
- Participated in cloud-native projects using AWS, Azure and GCP.
- Performed technical mentoring and peer code reviews.
- Contributed to software architecture decisions.
- Worked with Git, GitLab and Agile Scrum.

Tata Consultancy Services (TCS)

Software Engineer

Nov 2022 – Jul 2023

- Developed enterprise backend services using Java and Spring Boot.
- Designed REST APIs.
- Built scalable microservices.
- Contributed to cloud deployment processes, improving software delivery consistency across development and testing environments.
- Participated in Agile software development.

Softtek

Jun 2021 – Oct 2022

Software Engineer

- Developed enterprise Java applications using Spring Framework and Microservices while contributing throughout the Software Development Life Cycle.
- Designed reusable software components applying SOLID principles.
- Built RESTful APIs consumed by internal and external applications.
- Participated in software architecture discussions.
- Collaborated with cross-functional teams delivering enterprise software solutions.

PersonalSoft

Jul 2018 – Apr 2021

Software Engineer

- Designed and maintained enterprise Java applications supporting business-critical processes and cloud deployment initiatives.
- Developed and maintained RESTful services consumed by enterprise applications.
- Performed production support, bug fixing and root cause analysis.
- Contributed to application modernization initiatives by adopting new technologies and development best practices.

Corplas

Mar 2015 – Jun 2018

Junior Software Engineer

- Developed internal Java applications, provided production support and participated in software maintenance and database development.
- Implemented bug fixes and software enhancements.
- Assisted senior developers during application design and implementation.
- Supported production systems and end users.
- Participated in application deployments and software testing.

Education

Universidad de Cartagena

2010 – 2015

Bachelor's Degree, Software Engineer

Languages

English: Upper-intermediate · Spanish: Native
